

What is claimed is:

1. An electrically conductive fabric having a metal coating, wherein a percent fabric surface occupancy of warp as a constituent of the fabric is 90% to 110% and that of weft as a constituent of the fabric is 40% to 80%.
2. An electrically conductive fabric according to claim 1, wherein the fabric is a plain weave fabric.
3. An electrically conductive fabric according to claim 1, wherein [the] fibers which constitute the fabric are synthetic filaments.
4. An electrically conductive fabric according to claim 2, wherein [the] fibers which constitute the fabric are synthetic filaments.
5. An electrically conductive fabric according to any of claim 1, wherein the metal coating on the fabric is formed by an electroless plating method.
6. An electrically conductive fabric according to [any of] claim 1, wherein the metal of the metal coating is at least one member selected from the group consisting of silver, copper, nickel, tin, and alloys thereof.
